ABOUT

Omaks Printing & Packaging

Omaks Printing and Packaging is an innovative printing company based in Istanbul, Turkey that aims constant improvement and continuous growth. Customer satisfaction and permanent quality are our most important guidelines since we are incorporated.

Automatic filling lines compatible boxes, blisters, different secondary packaging types, boxes with different locking types, sales points, high strength laminated carton boxes and boxes made of corrugated cardboards are only a small part of our wide product range. We provide our customers all kinds of folding box solutions they need. Our main products are food boxes, cosmetic boxes, pharmaceutical boxes, chocolate boxes, stationary boxes, chewing gum boxes, confectionary boxes etc.

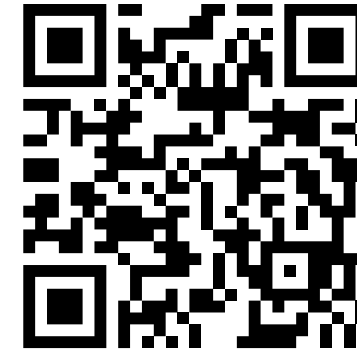

The company's constant improvement and maximum quality concept, which continues since its foundation, has been certified by ISO 9001:2015, FSC CoC certificates, BRC-PM guaranteeing the most hygienic environment for producing direct food contact and pharmaceutical packaging. Our technology and advancing systems are the indispensable parts of our corporate structure. Our professional team carries the quality level of Omaks to new levels each day.

The customer-focused mission of Omaks targets to meet customer expectations in the fastest way with a perspective which gives equal importance to production and service quality. With this attitude, Omaks provides integrated packaging solutions to the leading companies of Turkey within a wide range, from medicine to stationery, confectionery and industry.

Quality & Certificates

- In Omaks, we are committed to provide highest quality and safety in its packaging solutions and services. We are developing our processes constantly with the participation of all departments.
- Our aim is to reach the highest quality in terms of excellent customer satisfaction and minimized risk of failure in production. Our facility is hygiene and quality certified according to BRC-PM. We guarantee to comply national/international laws and regulations.
- We promote responsible forestry and comply with all Chain-of-Custody requirements as set by the FSC.
- We are member of SEDEX and confirm our social responsibility through successful social audits.
- As Omaks we will continue to stay at the forefront of the industry through our continuous investment in modern equipment and technology.

The mark of
responsible forestry

FSC™ WE CARE ABOUT NATURE

The mark of
responsible forestry

OMAKS Printing and Packaging guarantees that both in its production and preparation processes that directly or indirectly seen as unacceptable by the FSC™ does not take part in the following activities

- a** | Illegal logging or the trade in illegal wood or forest products;
- b** | Violation of traditional and human rights in forestry operations
- c** | Destruction of high conservation values in forestry operations
- d** | Significant conversion of forests to plantations or non-forest use;
- e** | Introduction of genetically modified organisms in forestry operations
- f** | Violation of any of the ILO Core Conventions as defined in the ILO Declaration on Fundamental Principles and Rights at Work.

COLOR MANAGEMENT

We are nominated supplier of world's famous brands. The management of color is a critical part of the control of quality and brand standards. We prefer to measure colors instead of visually checking to ensure excellent customer satisfaction. In Omaks, every element is measured and checked. We have packaging specifications for structures, why not for color?

Our production complies with ISO 12647 PSO Standard which is a color management standard that aims to produce consistent excellent quality results. It comes with a number of key benefits and makes it easier to print off previous print runs.

BRAILLE SCAN TECHNOLOGY

Braille alphabet is a system that enables blind and visually impaired people to read and write through touch.

OMAKS has brand new technology "**Accubraile System**" which applies **Braille** alphabet during the folding & gluing process.

Most importantly, BRAILLE-SCAN ensures perfect quality BRAILLE embossing. Braille scan controls **the quality of the Braille application** during the process for every single dot it allows the highest speeds in production without human intervention.

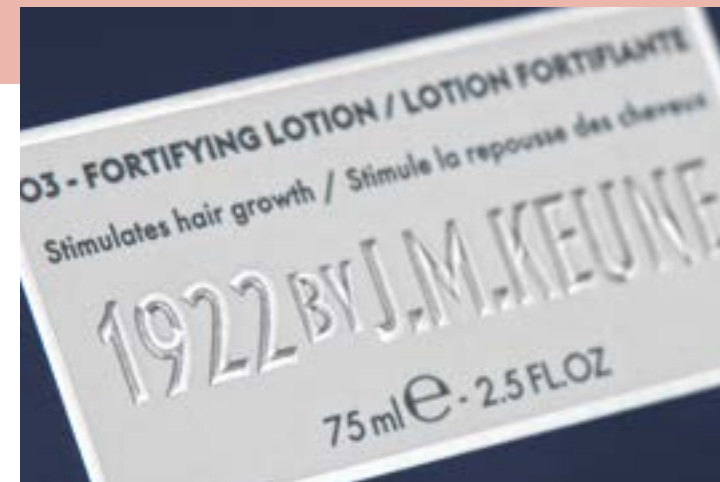

OPTICAL REGISTRATION TECHNOLOGY

To produce folding carton, we need to use different production processes. Registration is one of the most important element of these processes.

One of the valuable advantage of the optical registration system is that it allows us to emboss perfectly to the exact spot.

QUALITY CONTROL INSPECTION MACHINE

Millions of boxes are scanned 100% at high speeds through cameras to ensure quality control. In this way, burrs, dust, foil defects, inappropriate lacquer coatings, embossing defects and foreign body incompatibilities can be separated before being sent to the customer.

Due to wide range of our products and quality control of each product one by one makes our company the first preferred solution partner in national and international packaging sector.

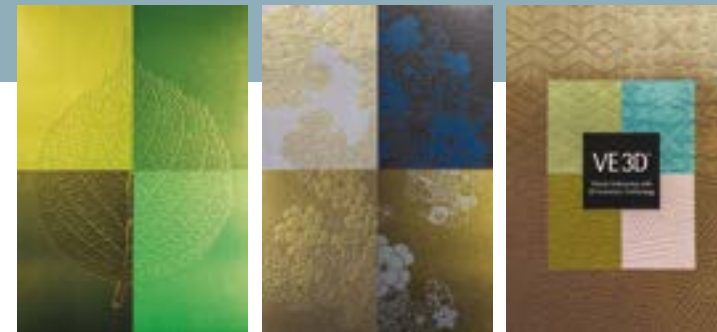

PRINTING PRESS WITH DOUBLE COATER

Packaging trends differ day by day. Drip off, soft touch, scent or effected lacquers and besides all these coatings, demands of security printing applications are increasing. To apply the best applications should have a printing press with double coater.

Mostly common matt-shiny spot effects can be produced inline with higher speeds and quality.

The world's unique printing press is in Omaks.

3D Embossing MERCK

COSMETICS BOXES

Our cosmetic boxes include, but are not limited to, beauty product boxes, hair products and different sorts of perfume packaging. We can apply many print finishing that will ensure a customized and luxury look, perfectly reflecting your brand.

Material 350 GSM C2S ENSOCOAT
Print 6 COLOR UV PRINT
Extras GOLD HOT FOIL + UV LACQUER

The Starskin packaging is a book and a box in one. The structural design for this project is very difficult and complex. With a smart die cut it was possible to construct a book that could be produced as a box. The outcome is a smart looking book containing seven facial masks. The entire product is a great present for the consumer and reflects the high standard of the product itself. The book has many ways of folding, so that all parts of the printed paper are visible.

A solution which exemplifies the heritage of cosmetics. The cosmetics inside the box contain only 100 % natural products and this is reflected in the packaging that consists of FSC carton only. Printed on uncoated material, this gives that distinct natural feeling. This range of products looks entirely different on the shelf in the shops and distinguishes itself from the competition. Cartonboard was also used for the inlays to result in recyclable packaging. The embossing emphasises the traditional style of this range of packaging.

- Material** 295 GSM GC1 METSABOARD PRO FBB BRIGHT
Print 2 COLOR METALLIC INK PRINT
Extras FULLY EMBOSSED + SPECIAL DESIGNED INLAYS

- Material** 250 GSM METSABOARD PRO FBB BRIGHT
Print 6 COLOR
Extras TWO SIDE PRINT + GOLD HOT FOIL + BLACK HOT FOIL + MATT SPOT VARNISH + GLOSS SPOT VARNISH

Compact Beauty

Combining different kinds of products within a box was the major challenge. This plain box securely stores and protects the ampoules, spray bottle and face masks. The aim was to apply a simple design so that every user could store and keep everything in place. In particular, the tray at the bottom of the box helps consumers to gain practical experience while using the product. Instead of a plastic tray and separators, the pack features a unique carton inlay.

- Material** 350 GSM C2S ENSOCOAT
Print 2 COLOR UV PRINT
Extras SILVER HOT FOIL + FULLY METALIZED SPECIAL TRAY+ SPECIAL DEVELOPED INLAYS

Natural Elegance

This box contains 100% natural cosmetic products to be used for skin care for cancer patients. Elegance and sustainability were the key elements in this pack, along with a design that was clearly simple but totally effective. In order to reflect the natural feeling, it is printed on uncoated material with a minimal design. Instead of plastic, the pack has cartonboard inlays that make the product visible and help the consumer to keep the cosmetic set together.

- Material** 295 GSM GC1 METSABOARD PRO FBB BRIGHT / 450 GSM BLACK CARDBOARD
Print 2 COLOR UV PRINT

International beauty guru Tom Sebastian has created a capsule that makes you look and feel younger. The structural designer, graphic designer and customer worked together to find the best pack. Although the box is complex to make, for the consumer it is a nice and easy to handle beauty case. Main goal was a two-walled envelope which can easily be filled. The development took seven months and the result even went beyond the customer's requirements – an easy to fill envelope.

The order was to create a truly unique storage option for keeping spare car keys - and it was to reflect the features of the brand. The successful application of graphic elements such as 3D embossing on a pale blue metallic surface and the classic "crumple zone" in the interior of the carton have created an unforgettable carton which also includes the name of the local car dealer.
